I am intersted in data science because i love to gain insights from Data.

## The following code tests the Gauss formula

In [2]:

```python
def gauss (n):
    return (n*(n+1))/2
gauss(100) == sum(range(101))
```

Out[2]:

True

# My Jupyter Notebook on IBM Watson Studio

## Name: Kiran Ahire

## Occupation: Business Analyst

**I am interested in data science because i am from statistics backgroung so i want to use my knowledge to solve real life problems by using ML algorithms.**

In [5]:

```python
a=2
b=7
c=a+b
print(c)
```

9
